NEW DELHI 3 (INDIA) ;
The 13th November, 1950.]

S. P. JAIN,
for Registrar General, India.

NATIONAL

SAVINGS

CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 21st October, 1950.

†Figures not available.

Explanation of symbols used:—B.—Births; B.R.—Birth rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fever; D.D.—Dysentery and Diarrhoea; R.D.—Respiratory Diseases; M.D.—Maternal deaths; D.R.—Death rate; I.D.—Infantile deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for the week ending the 21st October 1950 relate to 141 towns with an estimated population of 20,011 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 61% of the total number of towns representing 70% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 12,828 and 5,847 representing birth and death rates of 33.3 and 15.2 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 116 towns with an estimated population of 17,690 thousands. Information about Assam, Bihar and Madras could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 58% of the total number of towns representing 72% of the total population is covered. The numbers of births and deaths recorded in these towns were 11,519 and 5,199 representing birth

and death rates of 33.9 and 15.3 per thousand of population respectively. The table at the end gives the position by States.

Pandharpur in Bombay was the only town which had a high death rate of 57.6 per thousand of population and this high death rate was largely due to deaths from fevers and respiratory diseases.

(B) States (Part B).—The data here relate to 25 towns with an estimated population of 2,321 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 78% of the total number of towns representing 62% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,309 and 648 representing birth and death rates of 29.2 and 14.5 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
